Healthcare for International Students

Every International student in Alberta needs health coverage. You will need to obtain appropriate health care insurance **before** you arrive in Canada. You will not be covered by Canadian Health Insurance until you arrive in Canada or begin your studies. Therefore, you will need to arrange for another type of health insurance coverage before you arrive. If you are planning to study for a period longer than 12 months you are eligible to apply for AHCIP at no cost. You are strongly encouraged to purchase supplemental health insurance. Winter Weather

If you are not from a country with cold winters (October to April), you will want to be sure to purchase a warm (well-lined) winter coat, hat, mittens, scarf, lined boots and underwear known as “long Johns”.

Winter Tips

1. Don't take chances with cold weather. Be sure to find out the weather forecast by either listening to a local radio station, reading it in the newspaper or checking online at weather.com, and then dress accordingly.
2. Warm, winter clothing is a necessity. It can be quite cold some days and you will need warm clothing to stay healthy. Try wearing several layers of clothing. It is much easier to remove a layer or two if you become too warm than to get warmer by adding another layer.
3. Ask others that are familiar with the climate for advice. Speak with other international students, classmates or the Student Services Department for assistance.
4. Be sure to eat breakfast. Your body will stay warmer if you have some fuel to burn.
5. Use moisturizing creams and conditioners. Your skin and scalp may become dry and flaky due to the cold and the dry heat indoors. In addition, drinking 8 glasses of water daily will help to prevent dehydration.
6. Protect your eyes and skin from the sunlight reflected from the snow. You can protect your eyes by wearing sunglasses and your skin by putting on sunscreen.
7. The wind chill factor is something to consider. The temperature can feel colder because of high blowing winds.
8. Be aware of frostbite. Exposing your ears, fingers, toes or cheeks to extreme freezing temperatures, even for a short period of time, may cause them to be severely damaged. Seek medical help immediately if any part of your body should lack feeling or become white or slightly blue.
9. Seek help if you become stranded in the cold. If for some reason you are stranded in the cold with no transportation, then go to the nearest shelter to warm up. If you happen to be in a rural area, then you may need to knock on the closest door and ask if you can come in for a short period of time. Don't risk being out in freezing temperatures for prolonged periods of time since it can be life threatening.
10. When driving always keep a warm blanket, a candle and matches in the car. If your car ever has mechanical problems these items will be invaluable for keeping warm.
